

KPIA - General Downing - Peoria International Airport

Peoria, Illinois, USA, FSX Photo Real Scenery

By Glenn Johnson

This Photo Real scenery is a complete rebuild for the FSX Default KPIA airport using the latest version of ADE, SBuilderX scenery design tool, & Google SketchUp. This scenery includes completely rebuilt terminal buildings, FedEx Hub buildings, National Guard buildings, realistic area Google Earth buildings, night lighting, and photo real ground textures that give the airport a more realistic feeling. I constructed this scenery using some FSX textures and imported Google Earth Buildings via Google SketchUp. The runways and airport aprons are aligned to match Google & Yahoo satellite imagery.

I hope you enjoy the scenery. Your feedback is welcomed.

Installation:

1. Copy the KPIA_PR Folder and Paste it into your; [Microsoft Flight Simulator X/Addon Scenery folder](#).
2. Start FSX and activate the KPIA_PR scenery under the settings, scenery library tab.
3. That's it...

To Uninstall:

- Deactivate and/or delete the KPIA_PR in the settings, scenery library tab.
